On the Cover

A male Golden toad (*Bufo periglenes*) at the Monteverde Cloud Forest Reserve, Costa Rica. Sadly, there have been no confirmed sightings of Golden toads seen since May of 1989, when a single male was seen. No one knows why this species disappeared from its pristine forest surroundings, far from human activities.

Golden toad photographs generously donated by Michael and Patricia Fogden, Natural History Photographers, Kinbuck, Dunblane, Perthshire FK15 9JU, Scotland, UK. Tel/fax: +44 1786 822069.
