## GLOSSARY

Definitions of words footnoted in journal articles.

- P. 6-14 <sup>a</sup>*autoecological*.—Is the study of the relationship of individual organisms to their environment.  
<sup>b</sup>*xeric*.—"Dry," of or pertaining to a habitat having a low or inadequate supply of moisture.  
<sup>c</sup>*sisal*.—A species of agave grown for commercial production of fiber.
- P. 15-23 <sup>d</sup>*aestivation*.—A state of inactivity occurring in some animals during prolonged periods of drought or heat.
- P. 24-29 *Diplodactylidae* (In title).—Family of southwest Pacific geckos and pygopods, distributed in Australia, New Zealand, New Caledonia, and in the case of pygopods, New Guinea.  
<sup>e</sup>*carphodactylus*.—Adjectival form of *Carphodactylini*, a tribe of the *Diplodactylidae* including *Rhacodactylus*.  
<sup>f</sup>*viviparity*.—Reproductive mode in which development takes place within the mother and young are born live, as opposed to oviparity, in which eggs are laid.  
<sup>g</sup>*allozymic*.—In reference to allozymes, the different forms of proteins that can be separated by electrophoresis to yield evidence about relationships or similarity of individuals within or between populations and species.  
<sup>h</sup>*polymorphic*.—Having many forms, usually refers to the presence of more than one manifestation of particular characters within a single taxon.  
<sup>i</sup>*genetic distance data*.—Measurements of the relative similarity between taxa or individuals being compared, based on direct or indirect genetic information. In this instance, genetic distance data were derived from the allozyme data obtained by electrophoresis.  
<sup>j</sup>*sclerophyll forest*.—Critically endangered dry forest found only in isolated pockets on the west coast of New Caledonia.  
<sup>k</sup>*maquis vegetation*.—The characteristic and highly endemic scrub vegetation of the mineral-rich soils of parts of New Caledonia, especially the south.

## ABBREVIATION USAGE

New abbreviations appear herein. Past issues should be consulted for previous abbreviation usage.

W = West	N = North
E = East	S = South
et al. = and others	F = Fahrenheit
e.g. = for example	C = Celsius
cm = centimeter	tel = telephone
mm = millimeter	fax = facsimile
km = kilometer	email = electronic mail
kg = kilogram	ha = hectares
m = meter	U.S. and US = United States
UK = United Kingdom	USA = United States of America
p. = pages, page	pers. = personal
~ = approximately	obs. = observation(s)
fig. = figure	comm. = communication(s)

## ERRATA

The following journal corrections should be noted in Volume 1, Number 1 (Premiere issue): Page 3. CONTENTS PAGE. The article under Next Issue: *Conservation of South African's Endemic Dwarf Chameleons* has been postponed indefinitely. MASTHEAD. The premiere issue (Volume 1, Number 1) is out-of-print and no longer available, although nicely reproduced photocopies are available for \$10 plus shipping and handling. All back issues are available for \$12 each while regular supplies last. PAGE 10. In the "Key words" section the word *Viridi* should

have been spelled *Viridis*. PAGE 16. Under the photo caption the word *Plethodon* should have been spelled *Plethodon*. PAGE 20. The third sentence of the body of the article should read "Inbreeding depression may adversely affect small populations by unmasking recessive deleterious alleles and reducing heterozygosity." Pages 24-26. COLUMN. 1). The personal communication on page 25 (Groombridge 1994) was not attributed to Dr. Brian Groombridge of the World Conservation Monitoring Centre (WCMC), Cambridge, England. 2). The WCMC database, referred to in the column, is in fact the CITES database of trade records. 3). By comparing export records and import records, and checking against known countries of origin, it is in fact possible to get some idea of the extent of misreporting (The updated commentary for this particular article was provided by Brian Groombridge on November 8, 1996). PAGE 27. Meetings. The meeting date for the conference *Conservation and Biodiversity of Amphibians and Reptiles of Tropical Rain Forests* was re-scheduled for June 1999 and was then subsequently cancelled.

NOTE.—The most up-to-date *Writer's Guidelines and Manuscript Preparation Instructions* can be located at the *Amphibian and Reptile Conservation* website at: [www.herpetafauna.com](http://www.herpetafauna.com)

## ACKNOWLEDGEMENTS

As the journal grows and climbs towards international as well as domestic prominence, a growing list of individuals and organizations must be credited with their help, assistance, and support.

Individuals who have kept their enthusiasm and support for the project, as well as me individually, are Jack Sites, Harvey Lillywhite, Mark Goodwin, Jamie Reaser, Craig Hoover, Carl Gans, Peter Lindeman, Maria Bridarolli, John Megahan, Dave Stone, Chris Raxworthy, Ron Nussbaum, Aaron Bauer, Kraig Adler, Allison Alberts, Michael Soulé, George Rabb, Tony Krzysik, Jude McNally, Trevor Hare, Dave Hardy, and Dennis Caldwell. A special thanks goes to Dave Piper, Jeff Middleton, and Jose Solorzano and to all the authors, contributors, and associates of the journal. Without your generous support, help, and patience this journal would not exist.

Organizations which should be acknowledged for their support and use of facilities are the Information Technology Center staff and facility (especially, Dave Piper, Jeff Middleton, and Jose Solorzano), Arizona Health Sciences Library; Science Reference, Science-Engineering Library; and Multimedia & Visualization Lab, Center for Computing & Information Technology; all at the University of Arizona, Tucson, Arizona; University Computing Services, Brigham Young University, Provo, Utah; F. Wayne King and the Museum of Natural History, University of Florida, Gainesville, Florida.

A special tribute is extended to GRM of Tucson, Arizona, and specifically Arnell McSwain, Dennis Barreras, Albert D. Jones, Darryl A. Lacey, John Roden, Everett E. Sellers, Donald Batson, Chipper Ward, David Morrow, Tim Church, and Leland McKirryher for support, help, and friendship.

A very special thanks goes to Kenneth Sholar, our graphic designer, who when I had all but given up on finding a talented graphics person to work with on the journal, took on the task regardless of the fact he was working three jobs and attending school full-time. ARC and I extend a heart felt thanks for his commitment and fine work in helping get the journal "just right" in every detail.

## DEDICATION

This issue is kindly dedicated to my family: my mother Frances, my dad Anthony, and both my brothers Steve, and Greg Hasspakis.
